

CUMULATIVE INDEX 1992

Volume 36

January	HYDROXYAPATITE-COATED IMPLANTS, pages 1-278
April	ENDODONTICS, pages 279-550
July	COMPREHENSIVE FIXED PROSTHODONTICS, pages 551-840
October	TOPICS IN ORAL DIAGNOSIS I, pages 841-1020

Note: Page numbers of article titles are in **boldface** type

- Abrasion, and extensive tooth wear, 653
Abscess, during root canal therapy, 415
 analgesics for, 421-422
 antibiotic sensitivity testing in, 420-421
 apical foramen trephination for, 419
 drainage through tooth, 418
 hot saline holds for, 419-420
 identification of, 417
 incision and drainage of, 418
 treatment for, emergency, 417-422
 follow-up, 422-423
Abutment, heads of, for Integral implant system, 196
 prognosis in, in fixed prosthodontics for older adults, 786-787
Acetaminophen, for endodontic surgery, 358
Actinic keratoses, recognition by dentist, 968-969
Acyclovir, for herpes simplex virus infection, in immunosuppressed patient, 890-891
 in nonsurgical cancer therapy, 957-958
 primary, 889
 recurrent, 890
 for herpetic whitlow, 892
Adenocystic carcinoma, oral, 934
Age, and oral cancer, 919-920
AIDS, recurrent herpes simplex virus infection in, 887
Alceram (Cerestore) crown system, 772
Alcohol, and oral cancer, 924
Alcohol/phenolic combinations, as chemical disinfectants, 817
Aldehydes, in root canal therapy, 345-346
Alginates, antimicrobial, for dental impressions, 671-674
Alloys, metal ceramic, for fixed prosthodontics, 681
Alpha seal, for canal obturation, 338-339
Aluminous porcelain jacket crown system, 770-771
Alveolar crest, Integral implant in, 133-134
Amalgam, for endodontic dowel and core systems, 645-646
 for root-end filling, in endodontic surgery, 365-366
 restorations with, lining of, glass-ionomer cements for, 707-708
Amelogenesis imperfecta, and extensive tooth wear, 652-653
Anatomic radiolucencies, and apparent pulpal disease, 287-288
Anemia, in nonsurgical cancer therapy, 958
Anesthesia, and pain, 396-400
 regional, in root canal therapy, 398
Anesthetics, injectable, for pulpal pain, 396-398
Antibiotic sensitivity testing, in abscess, 420-421
Antibiotics, and predisposition to *Candida* infection, 861
 in root canal therapy, 346-347, 414-415
Antifungal agents, prescriptions for, 914
Antimicrobial alginates, for impressions, 671-674
Antral membrane, tearing of, during sinus lift graft, 159-160

- Apex locators, 297-304
 advantages and disadvantages of, 301
 frequency-dependent, 300-301, 304
 historical perspective on, 297-298
 impedance-type, 300-301, 303-304
 in vivo accuracy of, 299
 relationship to tooth and oral mucosa, 298
 resistance-type, 298-303
- Aphthous ulcers, 906-908
- Apical clearing, in canal preparation, 316-317
- Apical constriction, radiographic identification of, 295
- Apical enlargement, in canal preparation, 318
- Apical filing, in canal preparation, 312, 315
- Apical foramen, radiographic identification of, 295
 trephination of, in abscess, 419
- Apical inflammatory resorption, radiography of, 479
- Apical perforation, inaccessible, microsurgical techniques for, 450-455
 retreatment of, 490
- Apical periodontitis, in endodontic treatment failure, 476
- Apical preparation, in endodontic surgery, 314-315, 363-364
- Apicoectomy, definition of, 357
- APR press-fit hip replacement, appliances for, 240
- Arc of closure, in diagnostic casts for fixed prosthodontics, 552-555
- Arteritis, temporal, facial pain with, 988-989, 994
- Arthritis, facial pain with, 988-989
- Atypical facial pain syndrome, and apparent pulpal disease, 290-291
- Auricular prosthesis, 218
- Autogenous bone grafts, for peri-implant defects, 127
- Avulsions, 425-437
 ankylosis of, external resorption in, 433-435
 epidemiology of, 427
 external resorption in, inflammatory, 431-433
 replacement (ankylosis), 433-435
 management of, controversies in, 427-429
 blood clot, 428
 calcium hydroxide, 429
 extraoral time, 429
 intraoral vs extraoral treatment, 427
 periodontal ligament, 428
 splinting, 428-429
 therapeutic modalities and materials in, 435
 research in, 435
 sequelae in, clinically relevant, 430-435
 treatment guidelines in, American Association of Endodontists, 430
 Andreasen and Andreasen, 431
- Azathioprine, for cicatricial pemphigoid, 900
 prescriptions for, 913
- Bacterial infection, and swelling, during root canal therapy, 414
- Balanced forces, in canal preparation, 318
- Barrier system, in infection control, definition of, 811
- Basal cell nevus syndrome, recognition by dentist, 974
- Behavior, and pain, 394-396
- Benzalkonium chloride, for oral candidosis, 872
- Betamethasone, topical, prescriptions for, 912
- Beveling, in apical canal preparation, 364
- Bicuspidization, definition of, 358
- Bio-oss natural bone mineral, for sinus lift grafts, 171-173
- Bioactive coatings, applications of, methods of, 2
- Bioburden, and disinfectant effectiveness, 818
- Biocompatibility, in crown restorations, problems with, 778
- Bioflavonoid-ascorbic acid complex, for recurrent herpes simplex virus infection, 890
- Biologic attachment, for load-bearing implants, 235
- Biomaterials, dissolution rate for, 6, 11
- Biomechanical considerations, with dental implants, 713-718
- Bite problem, occlusal, previous therapy and, treatment of, 585-587
 temporomandibular disorder and, prevention of, 587-588
 treatment of, 582-585
- Blood clot, in tooth avulsions, controversies in, 428
- Bone, allografts of, for peri-implant defects, 127, 130
 freeze-dried demineralized, for sinus lift grafts, 177-178
 loss of, with endosseous implants, 32, 34
- Bone cyst, traumatic, and apparent pulpal disease, 288
- Bone marrow transplantation, oral complications of, 945-946
- Bony defects, 117-149

- with endosteal implants, definition of, 118-119
 - editor's comments on, 149-150
- with failing dental implants, combined
 - causes of, 142, 145
 - etiology of, 140-142
 - factors contributing to, 145
 - flap surgery for, 141
 - inflammation and dehiscence in, 143-144
 - microbiology of, 142
 - occlusal trauma and, 142
 - treatment of, 140-145
- Brilliant resin system, for fixed prosthodontics, 685
- Broadrick Occlusal Plane Analyzer, 566-567
- Brown's tumor, and apparent pulpal disease, 288-289
- Buccal cusp, fracture of, with occlusal wear, 784
- Buccal groove, Cerec System design of, 800
- CAD/CAM design, for hydroxyapatite-coated superiosteal implants, studies of, 77-95
- Calcitite-coated press-fit hip replacement, clinical results from, 239-246
- Calcium hydroxide, dentin stimulation by, 529
 - in root canal therapy, 347
 - in tooth avulsions, controversies in, 429
- Calcium phosphate biomaterials, applications in dentistry, 21-22
 - early evolution of, 19-22
 - in periodontics, 22-23
- Calcium phosphate ceramics, benefits of, 21
 - for load-bearing implants, 236
 - for sinus lift grafts, 163
 - mechanical limitations of, 21-22
- Calcium phosphate coating(s), 1-18, 221-224
 - biointegration of, 11
 - concerns regarding, 10-13
 - damage to, 10-11
 - dissolution of, 11
 - for dental implants, editor's comments on, 225
 - glow-discharge treatment of, findings in, 222-223
 - materials and methods for, 221-222
 - future of, 14-15
 - scanning electron micrograph of, 4
 - separation of, 11
- Canal obturation, contemporary perspectives on, 327-341
 - instruments for, 330
- Canal preparation, 309-326
 - automated techniques in, 321-324
 - chemical adjuncts in, 321
 - cleaning in, 310-313
 - evaluation of, 311-312
 - entrance route in, 311
 - for canal obturation, 333-334
 - shaping in, 313-315
 - vibration in, 323
- Cancer, chemotherapy of, recurrent herpes simplex virus infection with, 886
 - nonsurgical therapy for, oral complications of, 945-966
 - acute, 950-960
 - chronic, 960-963
- oral, 919-944
 - biopsy of, 940
 - dentistry's responsibility in, 942
 - epidemiology of, 919-921
 - etiology and predisposing factors in, 921-927
 - alcohol, 924
 - impaired immunity, 926-927
 - marijuana smoking, 922
 - mechanical trauma, 925
 - mouthwash, 924-925
 - oral lichen planus, 926
 - smokeless tobacco, 923
 - smoking, 922
 - third world habits, 923-924
 - tobacco and alcohol, 924
 - ultraviolet light, 925-926
 - viruses, 926
 - exfoliative cytology of, 940
 - management of, 937-941
 - prevention of, 937
 - recognition of, 927-937
 - signs of, 928-936
 - sites of, 920-921
 - symptoms of, 928
 - toluidine blue staining of, 940
 - treatment of, 941
 - triage of, 937-940
 - pretreatment oral assessment in, 946-950
- Candida*, and candidosis, 857-878
 - pathogenicity of, 859
- Candidiasis. See *Candidosis*.
- Candidosis, 857-878
 - atrophic, 864-865
 - definition of, 857
 - epidemiology and predisposing factors in, 858-862
 - erythematous, 864
 - mucocutaneous, 863-864
 - mucosal, in nonsurgical cancer therapy, 954-955
 - oral, classification of, 862

Candidosis (*Continued*)

- clinical appearance of, 862-867
 - diagnosis of, 867-870
 - biopsy for, 870-871
 - cytologic smears for, 867-868
 - direct culture for, 869
 - treatment of, 870-874
 - oropharyngeal, risk factors for, 858
 - pseudomembranous, 863
 - in bone marrow transplant patient, 956
- Carcinoma, adenocystic, oral, 934
- basal cell, recognition by dentist, 971-974
 - squamous cell, oral, 931-933
 - recognition by dentist, 974-977
- Caries, cervical, with three-quarter crown restoration, 784
- with tipped prosthodontic abutment teeth, 608
 - function of apex locator with, 299, 301
 - restoration of, glass-ionomer cements for, 698
- Cast alloys, for endodontic dowel and core systems, 646
- Cast fabrication, diagnostic, for fixed prosthodontics, 551-557
- Cast restoration, **743-764**
- clinical procedures for, 754-758
 - casting stability of, 757
 - intraoral fitting of crowns and retainers, 754-757
 - binding retainer adjustment, 755-757
 - proximal contacts, 755
 - margin integrity of, 757
 - verification of occlusion in, 757-758
 - cutting of sprue for, 753
 - examination for defects, 751-752
 - fitting on die, 752-753
 - margin of, criteria for, 743
 - occlusion of, 754
 - proximal contacts of, 754
 - rough finishing of, 754
 - seating of, techniques to improve, 749-750
 - soldering of, 758-762
 - Castable ceramics, for fixed prosthodontics, 684-686
 - Cavit, as temporary restoration, in endodontics, 349-351
 - for root-end filling, in endodontic surgery, 367-368
 - Cemental dysplasia, periapical, and apparent pulpal disease, 289
 - Cementing technique, for load-bearing implants, improvements in, 235
 - Cementoma, and apparent pulpal disease, 289
 - Ceramic(s), castable, for fixed prosthodontics, 684-686
 - Ceramic block size, Cerec System
 - determination of, 804
 - Ceramic systems, for fixed prosthodontics, 686-688
 - Cerec System, for dental restoration
 - design and manufacturing, 798-805
 - inlay fabrication by, 800-802
 - milling by, 801
 - optical impression in, 800
 - preparation of, 799-800
 - try-in and cementation with, 801-805
 - Cerestore crown system, 772
 - Cerlay System, for dental restoration
 - design and manufacturing, 805-806
 - Cermet-ionomer cements, 694-695
 - Cervical resorption, radiography of, 480
 - Cervical spine, disorders of, and facial pain, 988-989
 - Charisma resin system, for fixed prosthodontics, 685
 - Cheilitis, actinic, recognition by dentist, 968-970
 - angular, candidosis and, 865
 - Chelators, in canal preparation, 321
 - Chemical disinfectant, definition of, 810-811
 - Chemotherapy, for oral cancer, 941
 - oral complications of, 945-946
 - Chief complaint, in facial pain, 990-995
 - in medically complex patient, 843
 - Chlorhexidine, for endodontic surgery, 358
 - for oral cancer therapy complications, 953
 - for oral candidosis, 871-872
 - Chlorine, compounds of, as chemical disinfectants, 813-814
 - in root canal therapy, 346
 - Chondrosarcoma, of jawbone,
 - radiographic appearance of, 939
 - Citric acid, for canal irrigation, 320
 - Class II lesions, glass-ionomer cements for, 702-704
 - Cleft palate, maxillofacial implants for, 210
 - Clinical examination, of medically complex patient, extraoral, 846-848
 - intraoral, 848-850
 - Clotrimazole, for oral candidosis, 871-873
 - prescriptions for, 914
 - Cluster headache, facial pain with, 994
 - Cold sensitivity, incomplete diagnostic examination of, 281-282
 - Complete blood count, for medically complex patient, 850
 - Composite resin, for endodontic dowel and core systems, 645

- indirect restorative systems using, for fixed prosthodontics, 683-685
- Concept resin system, for fixed prosthodontics, 685
- Cones, for lateral condensation, in canal obturation, 329
 - removal of, in endodontic retreatment, 486-487
- Congenital defects, maxillofacial implants for, 207-208
- Connective tissue, interposition of, in horizontal root fracture healing, 511-513
- Conquest resin system, for fixed prosthodontics, 685
- Core build-up, glass-ionomer cements for, 706-707
- CR Inlay resin system, for fixed prosthodontics, 685
- Cranial nerves, evaluation of, in facial pain, 997-998
- Crossbite, in fixed prosthodontics, orthodontic treatment for, 622
- Crowding, in fixed prosthodontics, orthodontic treatment for, 621-622
- Crown(s), contour of, in fixed prosthodontics for older adults, 788
 - failure of, causes of, 785
 - fitting of, in fixed prosthodontics, 743-764
 - in cast restoration, fitting of, 750-754
 - lengthening of, for fixed prosthodontics, orthodontic alternative to, 623-624
 - surgical, 559-560, 563-565
 - margins of, placement of, with Integral implant system, 190-191
- Crown-down technique, in canal preparation, 318
- Crown systems, 765-782
 - Alceram (Cerestore), 772
 - aluminous porcelain jacket, 770-771
 - choices of, 767
 - computer-assisted restorations in, 776
 - Dicor, 773-774
 - faulty appearances of, 766
 - gold, 767-768
 - Hi-Ceram, 771-772
 - ideal qualities of, 766-767
 - In-Ceram, 772-773
 - IPS Empress, 775-776
 - laboratory research on, problems in, 776-779
 - metal ceramic, properties of, 765
 - Optek HSP, 768-770
 - porcelain laminate veneer, 768-769
 - Procera, 774-775
 - Renaissance, 774
 - Sunrise, 774
- Curve of Spee, determination of, Broadrick Occlusal Plane Analyzer for, 566-567
- Custom master cones, for lateral condensation, in canal obturation, 329
- Cyclophosphamide, for cicatricial pemphigoid, 900
- Cylinder-shaped implants, 14, 42-53
 - bone growth on, 53
 - clinical and radiographic appearance of, 46
 - indications and contraindications for, 42-43
 - locations of, 46
 - mandibular restoration with, 48
 - periodontal review of, 47-52
 - bone loss, 48-49
 - inflammation, 50
 - keratinization around, 52
 - periodontal pathogens, 50
 - periodontal pocket, 51
 - placement of, 44-45
 - prostheses used with, 45
 - results with, 43-47
 - surgical and prosthetic technique for, 43
 - survival rate of, 47
- Cytologic smears, for candidosis diagnosis, 867-868
- Decision analysis, clinical, in fixed prosthodontics, 569-580
 - definition of, 570
 - elements of, 571
 - model for, 571
 - programmed, 579
 - scientific method for, 570-571
 - steps in, 572-577
 - structuring over time, 573-574
- Decision tree, for fixed prosthodontics, 573-574
 - interpretation of, 577-578
 - for prosthetic rehabilitation, 583
- Dehiscence, of endosteal implants,
 - definition of, 118
 - research on, 119-121, 127
- Demineralized bone, for endosseous implants, 32
- Dental casts. See also *Diagnostic casts*.
 - disinfection of, 1991 ADA recommendations for, 824-828
 - effect on quality, 827
 - for maxillary arch implants, 719
 - for preprosthodontic orthodontic treatment, 609
- Dental considerations, in herpes simplex virus infection, 892
- Dental extractions, in myelosuppressive therapy patients, guidelines for, 949

- Dental implant(s), 713-741. See also
Cylinder-shaped implants; Endosteal implants; Integral implants; Sinus lift grafts; Subperiosteal implants.
 abutment angulation in, 718
 anterior, nonaxial stresses on, 737
 arch form in, 715
 beaded metal porous surface, 10
 calcium phosphate coatings for, 1-18
 configuration of, 714-716
 copings and abutments for, 717
 fixed, 716
 fixed/detachable, 716-717
 for partially edentulous restoration, 730-734
 abutments for, 732-734
 fixed/detachable, 731-732
 force vectors in, 733
 removable, 732
 forces acting in, 715, 733
 fractured, with occlusal overload, 730
 hydroxyapatite for, analysis of, 19-26
 location of, 714
 macrotextured material for, 5
 removable, 717-718
 restorative protocols for, 716-718
 single-tooth prosthesis with, 734-740
 fixture placement in, 739
 interlocking abutments for, 737
 placement of, 738-739
 planning of, 734-736
 positioning of, 736-738
 posterior occlusal contacts in, 738
 restoration of, 739-740
 titanium, 8-9
- Dental impressions, alginate, aluminum sulfate treatment of, 822-823
 disinfection of, 1991 ADA recommendations for, 824-828
 process of, 823-824
 in fixed prosthodontics for older adults, 787-788
 Kerr's Extrude addition silicone for, 670
 materials for, for fixed prosthodontics, 666-674
 rinsing of, 820
 trimming of, 820
- Dental laboratory, dental impression disinfection in, 823-824
- Dental operatory, dental impression disinfection in, 823
- Dental prostheses. See also *Dental implant(s); Denture(s).*
 as predisposition to *Candida* infection, 860
- Dental restorations, esthetic, computerized design and manufacturing of, 797-807
- DentiCAD System, for dental restoration design and manufacturing, 806-807
- Dentin, acid etching of, in tooth restoration, 537-538
 citric acid-etched, scanning electron photomicrograph of, 533, 535
 phosphoric acid-etched, junction with polyamide varnish-treated, scanning electron photomicrograph of, 535
 physiology of, 528-530
- Dentin bonding/substitution, glass-ionomer cements for, 700-701
- Dentin permeability, 527-542
 biologic basis for, 527-530
 diagnostic and therapeutic considerations in, 538-540
 effect of caries on, 531-534
 effects of clinical dentistry on, 534-538
 role of tubules in, 531
- Dentin smear layers, effects of clinical dentistry on, 534-537
- Dentin softeners, in canal preparation, 321
- Dentinal fluid flow, mechanics of, 530-534
- Dentinal pain, differentiation of, 402
- Dentinal tubules, microleakage through, 536
 patency of, and inflammatory root resorption, 495
- Dentinocemental junction, radiographic determination of, 293-294
- Dentinogenesis imperfecta, and extensive tooth wear, 652-653
- Dentist, general, endodontist and, 459-471
 recognition of worrisome facial conditions by, 967-985
- Dentition, cancer pretreatment assessment of, 947-949
 severely worn, restoration of vertical occlusal dimension with, 651-664.
 See also under *Occlusion.*
- Denture(s), fixed partial, failure of, causes of, 785
 tissue response to, 595
 hygiene of, in oral candidosis, 871-872
